EDUCATION

B.Tech, Computer Science & Engineering (Data Science) 2023 – 2027
B V Raju Institute of Technology CGPA: 8.46

EXPERIENCE

ApexPlanet Software Pvt. Ltd. Virtual
Web Development Intern Jul – Aug 2025
•Developed responsive front-end modules using HTML, CSS, and JavaScript, implementing DOM-based interactive components and responsive design practices.

Smart Interviews Jun 2026
DSA Mentor
•Mentored students in Data Structures & Algorithms through structured problem-solving guidance.

RESEARCH & DEVELOPMENT

QTriFuse: Explainable Hybrid Quantum–Classical Framework with Adaptive Tri-Branch Feature Fusion for Brain Tumour MRI Classification Aug 2025 – 2026
•Developed a hybrid quantum–classical framework integrating ResNet50, Swin Transformer-Tiny, and MobileViT-S with adaptive gated feature fusion and an 8-qubit Variational Quantum Circuit (VQC).
•Implemented quantum feature learning using PennyLane, alongside Grad-CAM-based explainability and Structured Explanation Cards (SEC); evaluated using stratified 10-fold cross-validation.
•**Publication:** Manuscript under review at *Computer Methods and Programs in Biomedicine*.

PROJECTS

AI-Powered Brain Tumour MRI Analysis Platform Feb – Mar 2026
React.js, FastAPI, PyTorch, PennyLane, PostgreSQL GitHub | Live
•Developed a full-stack MRI analysis platform integrating QTriFuse, a hybrid quantum–classical model with VQC-based learning and adaptive gated feature fusion.
•Integrated FastAPI inference, Grad-CAM visualisations and SEC, deploying the quantum-enhanced model on Hugging Face and the frontend on Vercel.

AI-Powered Quiz Generator from Documents Jan – Feb 2026
React.js, FastAPI, Groq LLM, NLP, MongoDB GitHub | Live
•Built an AI-powered quiz generation system that extracts and processes PDF/DOCX content using text cleaning, chunking, and LLM-based MCQ generation with JSON validation and repair.
•Implemented adaptive difficulty based on user performance, bcrypt-based authentication, timed assessments, and MongoDB-backed quiz history with a performance dashboard.

Employee Payroll & Leave Management System Nov – Dec 2025
React.js, Node.js, Express.js, PostgreSQL, JWT GitHub | Live
•Developed a role-based full-stack application with JWT authentication to manage employee leave requests, manager approvals, and HR administration.
•Implemented PostgreSQL-backed leave quota and overlap validation, monthly payroll processing, and automated LOP deductions with payslip generation.

TECHNICAL SKILLS

Languages: Java, Python
Frameworks & Backend: React.js, Node.js, Express.js, FastAPI, REST APIs
Databases: MySQL, PostgreSQL
Data Visualisation : Power BI, Tableau
Software Engineering Tools: Git, GitHub, Postman, VS Code
AI/ML & Technologies: Machine Learning, Deep Learning, PyTorch, NLP, Hugging Face, PennyLane
Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

CERTIFICATIONS

Salesforce Certified Agentforce Specialist Dec 2025
Data Structures and Algorithms using Java – IIT Kharagpur Oct 2024

COMPETITIVE PROGRAMMING

650+ Problems Solved Across Coding Platforms | LeetCode (Rating: 1664) | CodeChef: 2-Star (Rating: 1411)

ACHIEVEMENTS

•Ranked 4632 among 56,000 participants in SI 2026 and received the Smart Coder Diamond Certificate.
•Runner-up, DataScix National Hackathon 2025
