EDUCATION

Bachelor of Technology	2023 – 2027
Computer Science and Engineering (Data Science)	
B V Raju Institute of Technology	CGPA: 8.57/10

EXPERIENCE

ApexPlanet Software Pvt. Ltd.	Virtual
Web Development Intern	July 2025 – Aug 2025
- Developed responsive web interfaces using HTML, CSS, and JavaScript, improving cross-device compatibility and user experience. - Implemented interactive components using DOM manipulation and event-driven scripting to enhance user interaction. - Delivered multiple front-end modules following responsive design principles and modern UI best practices.	

RESEARCH & DEVELOPMENT

An Explainable Transformer Architecture for Multi-Class Brain Tumour Classification from MRI Scans

- Manuscript under review at *Computer Methods and Programs in Biomedicine* (SCI Q1, IF: 4.8)
- Proposed a hybrid CNN–Transformer architecture (TriModel) for automated multi-class brain tumour classification from MRI scans
- Achieved **99.54%** classification accuracy through optimised multi-phase training and comprehensive evaluation
- Incorporated explainable AI using Grad-CAM and Structured Explanation Cards (SEC) for interpretable tumour localisation

PROJECTS

AI-Powered Brain Tumour MRI Analysis Platform

Python, PyTorch, OpenCV, FastAPI, React

- Developed a full-stack AI system for automated brain tumour classification from MRI scans, extending research work into a deployable application.
- Designed an end-to-end pipeline including MRI preprocessing, model inference, and result visualisation for real-time prediction.
- Integrated explainable AI using Grad-CAM to provide visual tumour localisation, enhancing interpretability for end users.
- Built a scalable web interface using FastAPI and React, enabling users to upload MRI scans and receive instant diagnostic predictions.

Multimodal AI Quiz Generator from PDFs and Images

Python, FastAPI, React, OCR, NLP

- Developed a multimodal AI system that generates structured multiple-choice questions from PDFs and images by combining OCR, NLP, and LLM-based reasoning.

- Designed a complete processing pipeline including document parsing, OCR-based text extraction, semantic chunking, and context-aware question generation.
- Implemented LLM-driven MCQ generation with controlled formatting and answer validation to ensure relevance and consistency of generated questions.
- Built a full-stack application using FastAPI and React, enabling users to upload learning materials and dynamically generate quizzes in real time.

Employee Payroll & Leave Management System

React.js, Node.js, Express.js, PostgreSQL

- Developed a full-stack payroll and leave management system with JWT-based authentication and role-based access control for Employee, Manager, and HR roles.
- Engineered end-to-end leave workflows with validation logic, including quota enforcement (CL, SL, LOP), manager approval flows, and automated payroll deductions.
- Designed normalized PostgreSQL schemas and built secure RESTful APIs for payroll processing, employee hierarchy mapping, and leave tracking.

TECHNICAL SKILLS

Programming Languages	Python, Java, C
Web Development	HTML, CSS, JavaScript, React.js, Node.js, Express.js, REST APIs
Databases	PostgreSQL, MySQL, MongoDB
Core Concepts	Data Structures and Algorithms, Object-Oriented Programming, DBMS
Tools	Git, GitHub, Postman

CERTIFICATIONS

• Data Structures and Algorithms using Java – IIT Kharagpur	Oct 2024
• Salesforce Certified Agentforce Specialist	Dec 2025
• Python for Data Science – IBM	Jul 2024

ACHIEVEMENTS

- Solved 160+ DSA problems on LeetCode (Rating: 1634).
- CodeChef 2-Star (Rating: 1411) and Codeforces max rating 845.
